Leadership-Establishing the right team!

“

**INDIVIDUALLY,
WE ARE ONE DROP.
TOGETHER,
WE ARE AN OCEAN.**

Ryunosuke Satoro

Myers-Briggs Type Indicator(MBTI)

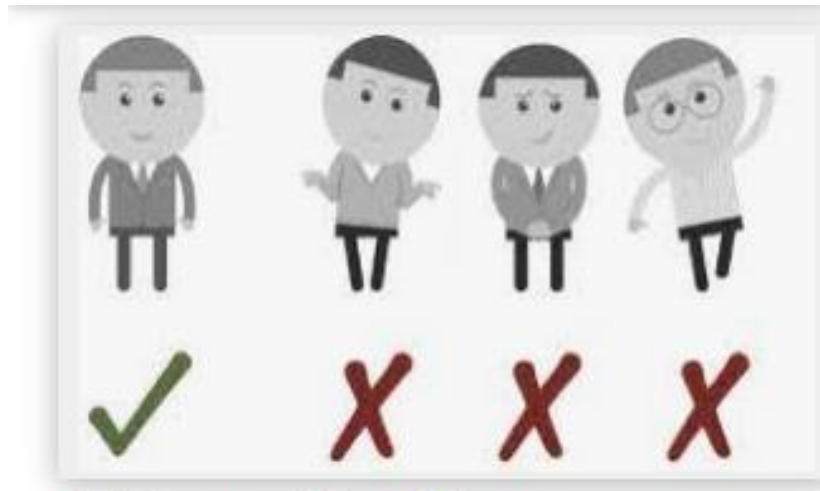

1. Are you outwardly or inwardly focused?
 - Extraversion-Introversion
2. How do you prefer to take in information?
 - Sensing-Intuition
3. How do you prefer to make decisions?
 - Thinking-Feeling
4. How do you prefer to live your outer life?
 - Judging-perceiving

Change in individual practice:

- *Awareness of my own personality type how this can affect others in a team. Building a team that consists of varying personality types working to the strengths of all of those in the team. Taking time to reflect and sit back before acting!*

Body Language In Presentations ...

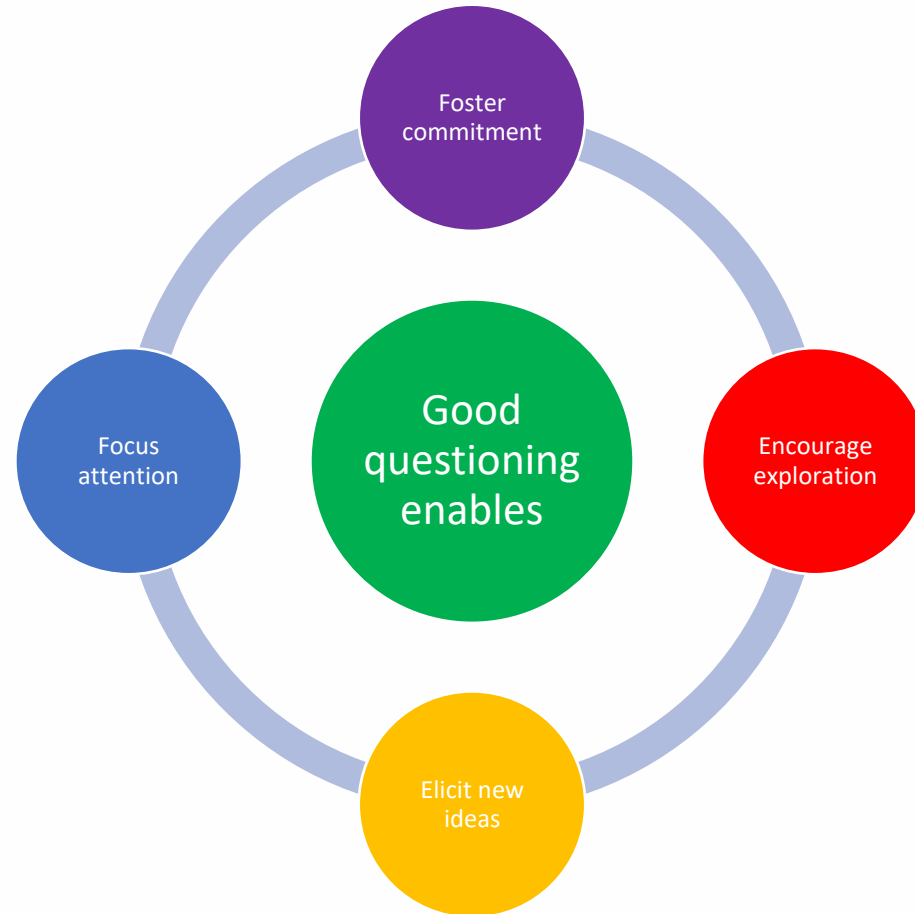

SPEAKING SKILLS

Co-Consulting: Active listening

Co-consulting: Good questioning

Quality Improvement Project: Improve peer support and wellbeing of young adults with myasthenia gravis aged 12– 16 years old.

Leadership learning

- Plan, do, act methodology was activated by identifying our project methodology of an experienced based co-design
- Definitive set stages facilitated the process making success less daunting. Allowed us to develop a comprehensive project initiation document to set clear criteria and timelines
- Set parameters on how to capture qualitative data on effective change improvements
- Clear template to follow when initiating project to adult services
- Client, consultant, observer workshops and the cycle of action learning enhanced interactions with young people to help identify ways and reasons of how to best serve our client population
